MEMORANDUM

September 3, 2015

TO: Honorable Mayor and City Commissioners

VIA: Kenneth Fields, City Manager

FROM: Dorothy Ecklund, Finance Director

SUBJECT: Ordinance 2015-10, Five-Year Capital Improvement Plan FY2015/16 - FY2019/20 – 1st Reading

SYNOPSIS: The Commissioners will consider adopting the Five-Year Capital Improvement Plan for fiscal years 2015/16 through 2019/20.

RECOMMENDATION

It is recommended that the City Commission approve after first reading Ordinance 2015-10 adopting the Five-Year Capital Improvement Plan for fiscal years 2015/16 through 2019/20.

BACKGROUND

In accordance with section 6.05 of the City Charter, Ordinance 2015-10 adopts the proposed 5-year Capital Improvement Plan (CIP) for the period FY2015/16 through FY2019/20. Capital improvements and capital acquisitions proposed for Year 1 of the 5-Year plan are incorporated into the FY15'16 operating budget, as are appropriation of funding sources necessary to implement Year 1 of the plan.

The 5-Year CIP document includes all capital facility and infrastructure improvements which staff believes should be undertaken during the next five years and supporting information to explain the necessity for the improvements. In addition, the CIP includes all capital equipment proposed for acquisition during this period. Cost estimates, method of funding and time schedule for the proposed improvements and equipment acquisitions are identified in the document.

The proposed 5-Year CIP totals \$46,866,606 and includes \$250,000 in land acquisition, \$3,026,715 in building improvements/acquisitions, \$39,001,713 in infrastructure and recreation improvements, \$3,606,778 in equipment acquisition, and \$981,400 in other capital outlay. Schedule "C", within the 5-year CIP, provides a detail listing of each asset type.

Improvements and equipment needs for the next 5 years were submitted by department heads with a justification of necessity and a recommended time schedule for completion or acquisition. These requests were prioritized by the City Manager in view of the available funding resources and urgency of need.

FISCAL IMPACT

Funding of the CIP will be accomplished through utilization of existing cash surpluses and current year operating revenues, future grants, private contributions, leases/debt service issuances, and impact fees. Growth related improvements will be funded by impact fees.

Costs of all capital improvements and equipment acquisitions are distributed over 5 years as follows:

Year 1 - FY2015/16	11,504,661
Year 2 - FY2016/17	17,612,913
Year 3 - FY2017/18	6,875,307
Year 4 - FY2018/19	3,827,118
Year 5 - FY2019/20	7,046,607
5 Year Total	<hr/> 46,866,606

All items scheduled for Year 1 are included in the proposed FY15'16 operating budget presented to the City Commission for consideration.

To replace a 2007 camera. The camera was repaired in 2013 at a cost of \$1,000. Thermal imaging cameras are used to assist firefighters in locating fire victims quicker by allowing firefighters to see through the smoke and dark conditions inside of a structure fire. The cameras are also helpful in locating fires in walls and attics. The 2007 camera stopped working in April 2015 and is not worth repairing.

TOTAL	5,000	0	0	0	0	5,000

Description:

One of the network switches in the administration building has been in production for ten years. The switch is operating, but is at the end of its life cycle and needs to be replaced within the next 24 months. This switch connects 24 computers to the network servers. Due to the switches' age and older technology, the speed at which the computers connect to the core network is reduced compared to current's standards.

Description:

This would complete a project which began during the 2011-12 fiscal year. This Point-to-Multipoint network would connect all of the remote City facilities via a high bandwidth wireless network backbone. There would be some minor return on the investment with this project as we would cancel any recurring internet costs to these facilities and could add additional network functionality to the facilities that we do not have now, due to the slow through put of WAN links.

TOTAL	477,000	0	1,908,000	0	0	2,385,000

Description:

After landside access and parking is made available to the east aircraft apron, and the apron is expanded and connected with the FBO apron, significant value will be created for the land abutting the expanded apron. This area will be well suited for a large business or corporate tenant seeking to establish a large hangar or hangar complex near the highly visible main entrance road of the airport.

Description:

The Eastern Aircraft Apron represents a significant resource to the airport and itinerant traffic. In the future, once landside access and parking is provided to this facility, its adjacent land will be poised for development. By expanding the apron and constructing a taxiway, the existing East Aircraft apron and FBO apron can be connected, thereby increasing the overall utility of each.

Description:

As a means to better support operations by the growing number of large and complex aircraft being experienced, a runway extension of at least 1,401 feet is highly recommended in the short-term development period. Furthermore, strengthening of the runway should also occur to bring its operational strength index to near 50,000 single wheel load. Additionally, this project would include an in-kind extension of taxiway A, the extension of LED medium intensity runway lights, the remarking of runway 6/24 to include a displaced threshold at the runway 24 end, and distance remaining signs along the runway shoulders. 15/16: Rehabilitate runway 6/24; Update the environmental assessment. 16/17: Extend 06/24: 17/18: Rehabilitate taxiway alpha east.

Description:

A precision approach to runway 6 is recommended to be developed within the mid-term of the planning period. Such and improvement would better support operations by aircraft in inclement weather as well as make airfield more attractive to general aviation and business aircraft alike. By utilizing GPS technologies to develop approach procedures and ground based lighting aids to heighten visual recognition of the airfield, low weather minimums are an achievable goal.

Lighting installation: Basketball courts (\$46,500), Dugout replacements (\$40,000) and Basketball court resurfacing (\$40,000). The field, tennis, and basketball court lighting has been severely damaged for a number of years and is only partially functioning. A portion of the lights are actually missing and need to be re-installed. The existing dugouts at the NW complex are in disrepair and should be replaced with modern low maintenance dugouts. The foundations of the dugouts have shifted substantially over the years, causing the block walls to severely fracture. These block dugouts need to be removed, new foundations poured, and modern chain-link style dugouts should be installed. The basketball court has many fractures and the lines are in need of painting. A simple overlay and new paint is all that is required to rehab the court. The lighting will be phased in beginning with the basketball court, then the tennis courts, then th

Filed Lighting expansion: Only 37.5% (approximately) of the necessary field lighting was installed when the complex was constructed. As a result, the majority of the complex is not usable after daylight hours. The fields that are currently lit require much more maintenance as they are overused due the availability of the lights. This next phase of light will be strategically installed in the center of the complex in an effort to light as many of the fields as possible, maximizing the dollars spent. This complex facilitates recreation for approximately 600 children annually. Parking Lot and ADA parking installation: 33,000.

Hydro tank replacement for tank at plant and to make the VFD's and old control panel compatible. VFD's for pump #1 are still on soft start. The soft start allows the pump drive unit to slow start instead of making the pumps turn on instantly causing a jerking motion of the pumps. The VFD's (Variable Frequency Drive) provides and maintains a steady speed for pumping. Engineering will be performed to determine what additional upgrades are needed to replace the additional storage tank that had been slated.
